new surface stainless steel matt PVD

PVD coatings are characterized by a very high degree of hardness. They are therefore insensitive to scratches and abrasion and have a high level of corrosion resistance. Thus, they are extremely sturdy and long-lasting.

DARK METAL MATT

the surface DARK BRONZE becomes DARK METAL MATT

With the new catalogue the surface DARK METAL MATT will replace our previous surface DARK BRONZE. So there will be no more DARK BRONZE articles in the collections anymore [except RAY lamp].

This new colour shade is only slightly more metallic and greyish. It therefore harmonizes better visually with surfaces such as Gun Metal matt and Dark Platinum matt.
